

Introductions

1. Name and affiliation
2. What EJ issues are you working on?
3. What kind of data do you need to help you further your goals?
4. What has been your involvement with Environmental Public Health Tracking?

CBE

- Power plants, stationery pollution facility
- Oil refineries, TA+ legal support + organizing
- Access to data (hard to get + bring to the community) to demonstrate needs of the community.
- Work with public health

Pacific Institute

- West Oakland + CCC
- Diesel impact on community
- Conducted a small community survey
- Has been involved in the CA pilot projects

Healthy Homes Collaborative

- Health and housing focus on lead
- Data that provides child blood lead levels—but not able to access

Center for Environmental Health

- need data that meets needs of the community

YUCA

- Traffic pollution and health

Urban Habitat

- EJ issues + health
- Access to public transit
- Community training leadership
- Development program—how to research

Green Action

- Bay View Hunters Point
- House all light/heavy/shipyard/power plants for SF
- Have access to exposure and health information but how to break this information down.

LEDERES

- Farm workers: workplace and environment
- Need to learn how to document data
- Need to learn how to use data

APEN

- Organizing in low-income communities
- Housing +community exposures and health
- Workplace exposures for semi conductor workers
- Data does not capture impact of our communities. What does exist does not reflect communities (diversity of API)

Safe Schools

- Telephone hot line about environmental exposure.
- Antidotal: need data to back up our documentation
- Meet with the school district to push our issue + need for monitoring
- Agencies are not gathering exposure data

East Yard

- Freeway environmental impact
- Need to have information to back up our documentation
- Respect for community issues, need to learn how to better articulate our message.

Haskell, Indian Nation's, Susanville, Tribe, Mountain

- Superfund sites, cleanup—effect on health and environment. We live of the earth.
